Mission

Committed to innovation, the Solomon R. Guggenheim Foundation collects, preserves, and interprets modern and contemporary art, and explores ideas across cultures through dynamic curatorial and educational initiatives and collaborations. With its constellation of architecturally and **culturally distinct museums**, exhibitions, publications, and digital platforms, **the foundation engages both local and global audiences**.

Engaging Local Communities in Venice

Venice's complex social landscape—shaped by depopulation and overtourism—requires the museum to balance global reach with strong local engagement, making residents its core audience and fostering inclusion, cohesion, and belonging.

Double Meaning: In Your Hands

Tactile reproductions, available throughout the exhibition spaces and at the Ticket Office, enable blind and partially sighted visitors to explore the museum independently.

The Museum as You've Never Seen It Before

Blind cultural mediators guided participants through the temporary exhibition *Marcel Duchamp and the Lure of the Copy*, offering a distinctive and engaging interpretation of Duchamp's readymades.

I Go to the Museum

The program encourages intercultural dialogue, empowering participants and creating meaningful connections with the museum's collections.

I Go to the Museum

The translanguaging is also applied in school visits with linguistically diverse student groups.

Participants in the galleries

Estate a Palazzo participants

Summer at the Palazzo

Estate a Palazzo engages people over 75 in workshops, tours, and creative activities, promoting lifelong learning, social connection, and community inclusion.

The Role of the Community

Understanding and listening to the audience is essential for shaping programs, from co-design to active participation. This approach ensures the museum remains a vibrant space for social connection, dialogue, and empowerment.

International Fellowship Program

The digital resources produced are accessible for blind and low vision audiences and encourage close and slow looking for all listeners. The audio tracks are available in multiple languages and hosted on the Foundation's various websites.

The Mind's Eye project's goals are to increase access to places and works of art through multisensory exploration and to create a center- lived experience through audio content featuring individual sensory experiences.

Mind's Eye Digital Constellation Project

The Mind's Eye digital project with Venice and Bilbao aims to provide access to each Guggenheim location through description of art and architecture.

A site for disability aesthetics

The body and its variations are a source of creativity. Programming in collaboration with disabled artists brings out the many ways our building is already a powerful site for disability aesthetics—and gives us further insight into how we can offer an even more welcoming experience for all visitors.

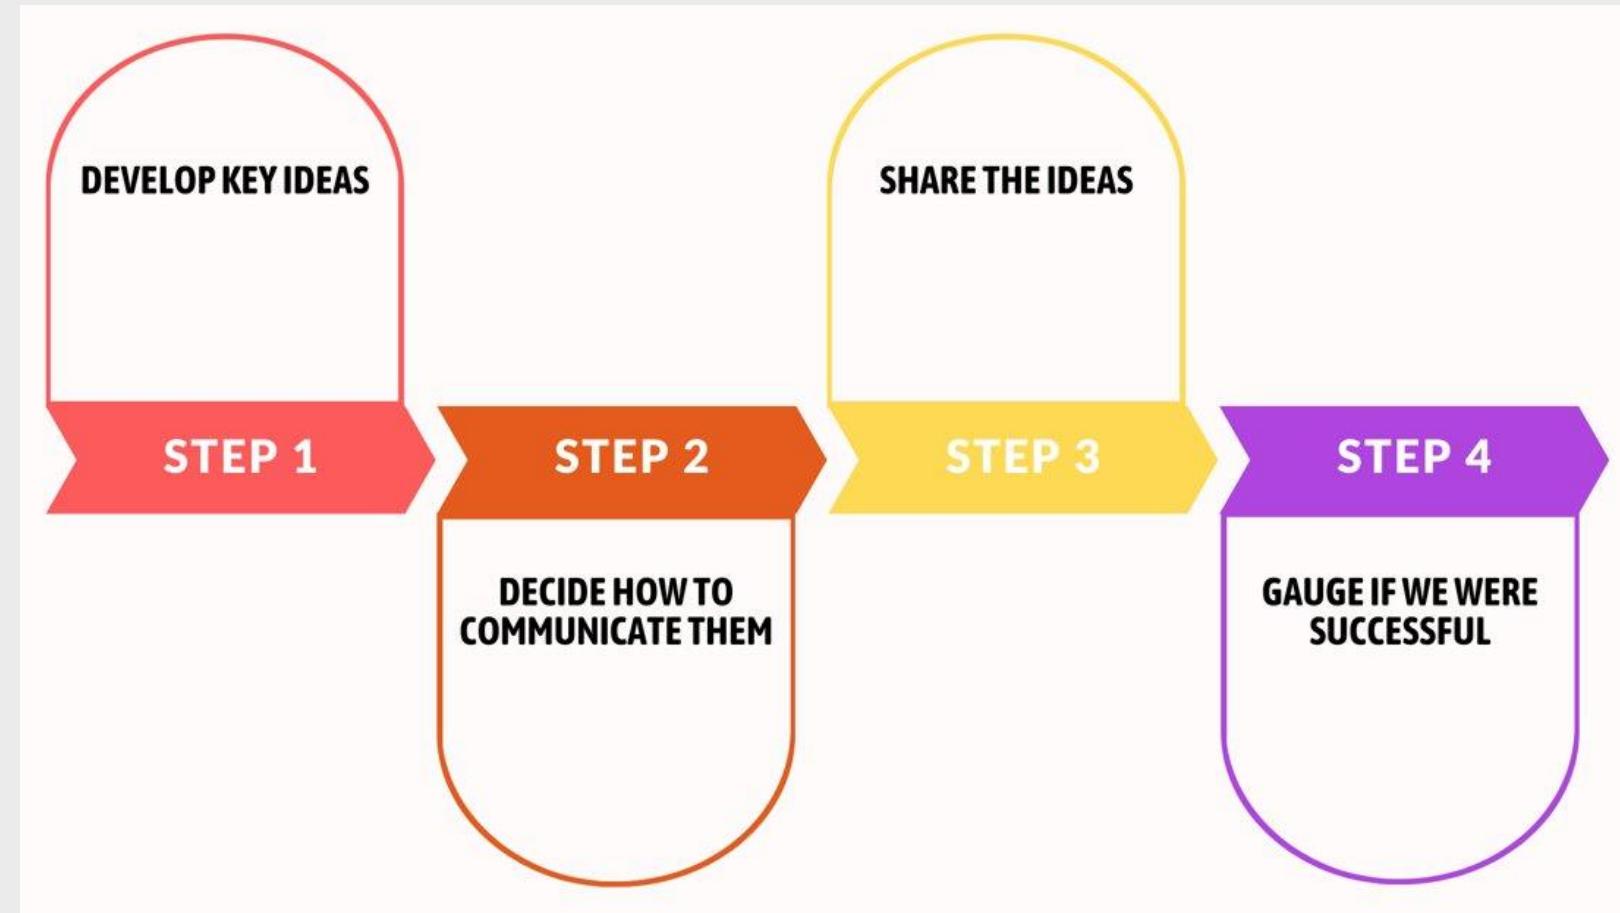

Guggenheim Interpretive Plan

An interpretive plan is a strategic roadmap to intentionally consider our audience first.

It focuses on how visitors experience our exhibitions, collection, and architecture through:

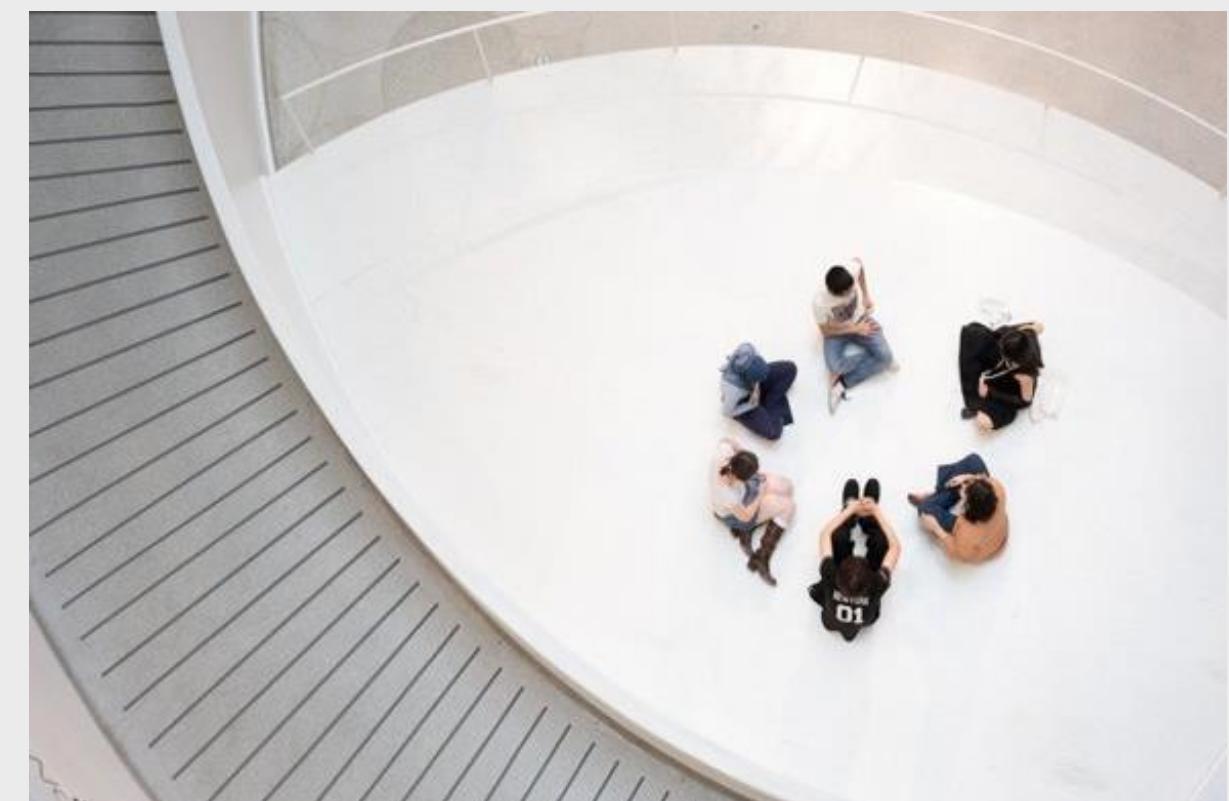

- in-gallery didactics (wall text and labels)
- programs and tours
- signage and navigation tools
- web- and app-based materials
- interpretive spaces

Effective interpretation ensures that everyone can access, experience, and make meaning from art.
